AYESHA NAZISH

Full Stack Developer | MERN Stack | WordPress | AI / ML

Peshawar, Pakistan | ash189180@gmail.com

linkedin.com/in/ayesha-nazish-452048274 | github.com/ash-1212 | ayeshanazish-portfolio.netlify.app

PROFESSIONAL SUMMARY

Gold Medalist Computer Science graduate (CGPA 3.97/4.0) with four software internships and hands-on experience in full stack, MERN stack, WordPress and AI development. Builds responsive interfaces with HTML5, CSS3, Bootstrap 5, JavaScript (ES6+), React.js and WordPress with Elementor; develops REST APIs with Node.js, Express.js, PHP and FastAPI backed by MongoDB, MySQL and PostgreSQL; and creates computer vision, OCR and NLP solutions in Python using YOLOv8, OpenCV and scikit-learn. Seeking a web or AI development role or internship.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, PHP, SQL

Markup and Styling: HTML5, CSS3, Bootstrap 5, Responsive Web Design

Frontend: React.js, React Router, Context API, Axios

Backend: Node.js, Express.js, RESTful APIs, Socket.io, FastAPI, JWT, bcrypt, Role-Based Access Control, Stripe

Databases: MongoDB, Mongoose, MySQL, PostgreSQL, SQLAlchemy

WordPress: WordPress CMS, Elementor, Themes, Plugins

AI / ML: Machine Learning, Computer Vision, Object Detection, OCR, NLP, scikit-learn, OpenCV, YOLOv8, Prompt Engineering

Tools: Git, GitHub, VS Code, XAMPP, Postman, Swagger UI, Streamlit, Netlify, AI-Assisted Development

EXPERIENCE

MERN Stack Developer Intern (Backend Lead) | Technexus, Remote **May 2026 – Jun 2026**

- Led backend development of a healthcare platform, building JWT-secured REST APIs integrated with React.js.

Full Stack Development and AI Intern | CodeAlpha, Remote **May 2026 – Jun 2026**

- Delivered full stack web applications and implemented real-time object detection and tracking with YOLOv8.

AI Intern | DecodeLabs, Remote **May 2026 – Jun 2026**

- Built three Python AI/ML projects: OCR and object detection, a KNN classifier and a TF-IDF job role recommender.

Full Stack Developer Intern | Devspire, Remote **Feb 2025 – May 2025**

- Developed full stack features connecting RESTful APIs with databases within a remote Agile team.

PROJECTS

Boston City Ride (Client Website UI) | WordPress, Elementor, Themes, Plugins, CSS bostoncityride.com

- Customized the UI of multiple pages on a client WordPress website, including Home, About, Services, Contact and Transportation.
- Built page layouts with Elementor and applied CSS and responsive adjustments for consistent display across screen sizes.

Hoku Health Care (Backend Lead) | Node.js, Express.js, MongoDB, JWT github.com/ash-1212/hoku-health-backend

- Designed 7 data models and 8 REST API modules with role-based access control for patients, doctors and admins.

Hands of Hope Mental Healthcare Website (Client Project) | MERN Stack Live Demo

- Developed a client website using the MERN stack, covering psychiatric evaluation, Alzheimer's care and therapy services.

TaskFlow | React.js, Node.js, Express.js, MongoDB, Socket.io github.com/ash-1212/CodeAlpha_ProjectManagementTool

- Developed a real-time project management application with JWT authentication and a drag-and-drop Kanban board.

Object Detection and Tracking | Python, YOLOv8, OpenCV, Streamlit github.com/ash-1212/object-detection

- Developed a real-time system that detects 80 object classes with persistent tracking IDs from video or webcam input.

AI Language Translation Tool | Python, Streamlit github.com/ash-1212/translation-tool

- Developed a translation application supporting more than 100 languages with language detection and text-to-speech.

EDUCATION

Bachelor of Science in Computer Science | City University of Science and Information Technology (CUSIT)

CGPA: 3.97 / 4.0 | Gold Medalist *Peshawar, Pakistan | Sep 2026*

CERTIFICATION

International Certification in Artificial Intelligence | NAVTTC

- Completed an international AI course on using AI tools to design, build and optimise modern websites.
