PROFESSIONAL SUMMARY

Gold Medalist Computer Science graduate (CGPA 3.97/4.0) and Full Stack / MERN Stack Developer with four software internships. Built and secured REST APIs with Node.js, Express.js and MongoDB for a healthcare platform and an e-commerce store, and develops real-time React.js applications. Also experienced with FastAPI and PostgreSQL, WordPress, and applied AI/ML (YOLOv8, OpenCV, scikit-learn). Seeking a Junior MERN Stack or Full Stack Developer role.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, HTML5, CSS3, SQL
Frontend: React.js, React Router, Context API, Axios, Bootstrap 5, Responsive Design
Backend: Node.js, Express.js, RESTful APIs, Socket.io, FastAPI, JWT, bcrypt, Stripe, Cloudinary
Databases: MongoDB, Mongoose, PostgreSQL, SQLAlchemy
AI / ML: AI-Assisted Web Development, Prompt Engineering, YOLOv8, OpenCV, scikit-learn, Streamlit, Machine Learning Fundamentals
Tools: Git, GitHub, VS Code, Postman, Swagger UI, Figma, Netlify, WordPress

EDUCATION

Bachelor of Science in Computer Science — **City University of Science and Information Technology (CUSIT)**
CGPA: 3.97 / 4.0 | Gold Medalist — *Peshawar, Pakistan | Sep 2026*

CERTIFICATIONS

International Certification in Artificial Intelligence | NAVTTC
- Completed an international AI course focused on using AI tools to design, build and optimise modern websites.
- Applies AI-assisted development and prompt engineering to improve productivity and code quality in full stack projects.

EXPERIENCE

MERN Stack Developer Intern (Backend Lead) | Technexus, Remote — **Apr 2026 – Jun 2026**
Code: github.com/ash-1212/hoku-health-backend
- Led server-side development of Hoku Health Care, a home healthcare platform, using the MERN stack.
- Designed 7 data models and 8 REST API modules covering appointments, doctor schedules, reminders and reviews.
- Secured the API with JWT, bcrypt and role-based access control for three user roles: patient, doctor and admin.
- Integrated the API with the React frontend and resolved integration issues across all three role dashboards.

Full Stack Development and AI Intern | CodeAlpha, Remote — **May 2026 – Jun 2026**
- Delivered full stack web applications as internship tasks: ShopNow (e-commerce), SocialApp (social media) and TaskFlow (project management).
- Implemented real-time object detection and tracking with YOLOv8 and ByteTrack as part of the AI deliverables.

AI Intern | DecodeLabs, Remote — **May 2026 – Jun 2026**
- Built three AI/ML projects: OCR and object detection (OpenCV, Tesseract, MobileNet-SSD), a K-Nearest Neighbors classifier (scikit-learn) and a TF-IDF job role recommender using cosine similarity.
- Applied prompt engineering and AI-assisted development techniques to support feature delivery.

Full Stack Developer Intern | Devspire, Remote — **Feb 2025 – May 2025**
- Developed full stack features by connecting RESTful APIs with databases.
- Collaborated within a remote Agile team to deliver assigned tasks.

PROJECTS

TaskFlow | React.js, Node.js, Express.js, MongoDB, Socket.io — github.com/ash-1212/CodeAlpha_ProjectManagementTool
- Developed a real-time project management application with JWT authentication and a drag-and-drop Kanban board.
- Implemented five Socket.io events so that task changes synchronise instantly for every project member.

Vegan Fresh (Backend Lead) | Node.js, Express.js, MongoDB, Stripe — github.com/ash-1212/vegan-fresh-backend
- Led API development for an organic grocery store, delivering nine feature modules from cart and orders to coupons.
- Integrated Stripe payments, Cloudinary image uploads and SendGrid email, with rate limiting for protection.

SocialApp | Node.js, Express.js, MongoDB, JavaScript — github.com/ash-1212/CodeAlpha_SocialMediaPlatform
- Built a full stack social media platform with JWT authentication, image posts, likes, comments and follow/unfollow.
- Implemented user search, profile pages with follower counts and image uploads using Multer.

G Care | FastAPI, PostgreSQL, SQLAlchemy — github.com/ash-1212/gcare-backend
- Engineered seven REST API modules for a healthcare website using FastAPI, PostgreSQL and SQLAlchemy.
- Validated the API through 26 endpoint test cases executed in Swagger UI.

Object Detection and Tracking | Python, YOLOv8, OpenCV, Streamlit — github.com/ash-1212/object-detection
- Developed a real-time system that detects 80 object classes from video or webcam input.
- Implemented persistent tracking IDs so that each detected object is followed across frames.

AI Language Translation Tool | Python, Streamlit — github.com/ash-1212/translation-tool
- Developed an AI-powered translation application that supports more than 100 languages.
- Implemented automatic language detection and text-to-speech output.
